

THANK YOU
FOR CHOOSING CALZURO® PRODUCTS

REBEL®

HOW TO ADJUST THE T-CLOSE® HEEL STRAP

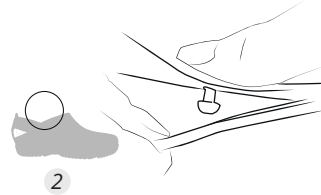

The patented system of heel closure, T-CLOSE®, is designed to make **REBEL®** comfortable and safe.

Once the hole on the strap is chosen, there will be no need to fasten/unfasten the T-CLOSE® heel strap to put on and take off the clogs.

To adjust the T-CLOSE® heel strap for the first use, please delicately unhook the strap keeping the rivet (the small button that closes the strap) steady. Put a finger on the base and one on the head of the rivet and gently pull the strap outward **1**. When you find the adequate hole in the strap

for a proper fitting, fasten the T-CLOSE® heel strap again stopping the base of the rivet with your thumbs and sliding the head of the rivet in the hole you chose **2**.

To put on and take off your **REBEL®** clogs, there will be no need to open the strap again: use the T-CLOSE® heel tab **3**.

N.B. do not tear the T-CLOSE® heel strap off (inward or outward) without stopping the rivet first.

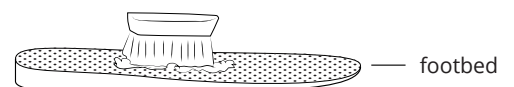

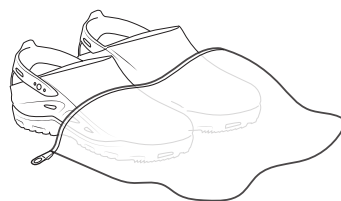

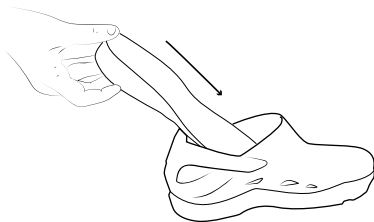

CLEANING AND MAINTENANCE:

TO PRESERVE THE PERFORMANCE AND FEATURES OF **REBEL®**, FOLLOW THESE INSTRUCTIONS THAT WILL GUARANTEE A LONG LIFE TO YOUR CLOGS.

WHEN YOU CLEAN YOUR **REBEL®**:

To wash* and sterilize* **REBEL®** clogs, the insole must be positioned inside the clog. Place the clogs correctly in the machine (autoclave, washing machine, dishwasher), making sure they do not hit the insides and mobile parts of the machine. To protect **REBEL®** and avoid crushing and micro cracks in its structure, it is advisable to use a proper container (such as shoe/clog laundry bag). For a daily cleaning you can hand wash your **REBEL®** using mild soap and soft cloth/sponge.

For a thorough cleaning, remove the insole and hand wash it separately using a soft cleaning brush. For an optimal drying, place clogs and insoles on a flat surface, far from heat sources and direct sunlight. You may use a soft cloth.

Do not flatten the upper of the clogs, bend the insoles or open the T-CLOSE® heel straps: cleaning and washing will be impeccable without stressing or deforming the structure of your **REBEL®**.

AUTOCLAVE UP TO 134°C / 273°F

WASHING MACHINE UP TO 100°C / 212°F

DISHWASHER UP TO 70°C / 158°F

***REBEL®** are sterilizable in autoclave up to 134°C/273°F, washable in washing machine up to 100°C/212°F and in dishwasher up to 70°C/158°F with mild soap/dish soap.
